

Professional consultancy – based on experience

The integration of e-business and shipping operations has been one of our main specialisations for many years.

You will benefit from:

- IT expertise combined with knowledge of your industry
- our efficient partners in the EDI sector
- IT consultancy at the highest level backed by long experience

Why not let us develop your personal EDI concept for you.
Simply contact us at any time!

Find out how you can benefit – right now!

All it takes is a call to your DPD customer consultant, who will be happy to present DELISedi in detail and make an appointment with you for the design of your individual IT interface with DPD.

You will find your local DPD depot at:
www.dpd.com

Data transmission
made to measure

In time with business.

DELISedi

Your individual IT interface with DPD

DELISedi: Data transfer in any format

With DELISedi we can offer you a service which enables you to receive or transmit existing electronic shipping data to DPD fully automatically. Simple and fast, whatever format is used.

Our support for you in your daily shipping operations.

EDI in the EDIFACT format – with DELISedi

For the data exchange with DELISedi we use standardised data formats which represent the basis for the data transformation. An example of this is the worldwide EDIFACT* standard.

A format in line with your requirements

Transfer your shipping data to DPD or receive status data from DPD in the EDIFACT format, e.g. IFTSTA for feeding directly into your own IT system! Or define an individual format with us which can then be customised to your requirements!

* Electronic Data Interchange For Administration, Commerce and Transport

Service in line with your needs

We provide you with the needs-based implementation of the following services:

- definition of the conversion from the source format to the target format
- central monitoring of data flows
- support for a range of communication protocols

Which is the right format for you?

- EDIFACT formats such as IFTSTA or IFTMIN
- An individual file format in XML, CSV, ASCII, SAP iDoc, Excel, VDA or PDF

The choice is yours!

And what do you have to do?

For your personal interface with DPD you simply provide us with all the necessary data for the conversion with DELISedi.

We take care of everything else.
