

DPD Shipper
The shipping
solution of DPD

What does DPD Shipper offer?

With DPD Shipper you enjoy excellent data quality. Your customer data is always complete and is sent on time, reducing the risk of delays to your shipments. That's reassuring, both for you and for the recipient.

In addition, the system is automatically updated with the most current routes and Pickup parcelshops in both the Netherlands and abroad. In addition, the label format is always correct. And you don't need to worry if the label requirements change, as the DPD Shipper labels will always comply with the latest requirements.

Furthermore, DPD Shipper stands for reliability, as regards both uptime and performance. The API has an average response time of 500 ms to make a label, and a general uptime of 99.95% is guaranteed.

Users of DPD Shipper enjoy further benefits. You can make use of DPD Insights, for example. With this program, you will be able to keep track of all your shipments at any time.

Always a DPD Shipper solution that suits you

DPD Shipper has several variants, from plug-ins for a start-up webshop to an integrated system that is linked to your ERP solution. So whether you print 100 labels a day, or more than 30,000, DPD always has a solution to suit you. On our website you will find an overview of all the label tools and plug-ins with their associated functionalities. In the pull-out page of this brochure you will find an overview of all the label tools and plug-ins with their associated functionalities. Simply choose how you want to create the link with your system and DPD Shipper will do the rest!
