

# Sustainability goals and implementation until 2030

DPD Switzerland has set itself the goal of reducing its CO<sub>2</sub> emissions by 75 % by 2030 (starting point: 2020). This ensures DPD Switzerland plays an active role in reducing the burden on the environment.

## How do we want to achieve these goals?

### First and last mile

Transitioning the PUD fleet to zero-emission vehicles:

- 30 % until 2025
- 100 % until 2030

By 2025, we will make deliveries to at least ten cities using zero-emission vehicles.

### Line haul

Transitioning the truck fleet to zero-emission vehicles:

- 25 % until 2025
- 55 % until 2030

### Energy

Using electricity from renewable sources only:

- Installation of solar panels at the depots to produce and use our own electricity.
- We are building an infrastructure for charging guests' and employees' electric vehicles at our locations.
- All our forklifts at the depots are electric vehicles.

We offset 100 % of the emissions from your parcels through renewable energy projects – at no cost to you or your customers – and we've been doing this since 2012!
