**Surcharges and other fees for permanent partners with a signed contract**

**1. Energy surcharge**

The energy surcharge is determined by taking into account the surcharges of the following two energy (carriers) (gas oil and electricity) in proportion to the composition of the so-called energy mix, which is reviewed quarterly for the DPD, and is billed on the basis of the published unit price of these energy (carriers) on a monthly basis.

<b>ENERGY surcharge</b>	The tables below help you calculate the energy surcharge. The surcharge is calculated on the basis of the current market price of diesel, electricity and CNG gas, taking into account the proportion of delivery vans in DPD Hungary's fleet (% distribution of electric, diesel and CNG cars)

\*\* <https://nav.gov.hu/ugyfeliranytu/uzemanyag/2023-ban-alkalmazhato-uzemanyagarak>

The surcharges will be adjusted on the first working day of each month, in such a way that the surcharge rate for diesel and CNG is calculated from the average price set by the NAV for the month. For electricity, the average monthly price is the latest available monthly average price from the Hungarian Power Exchange. The energy surcharge will be calculated on the basis of the distribution of the types of vehicles in DPD's current fleet, which will be adjusted quarterly. The current surcharges will continue to be published on the official DPD Hungary website.

## 2. **PEAK surcharge**

For parcels sent between 1 November and 31 December each year, a PEAK surcharge is charged per parcel. The surcharge per parcel is HUF 150. DPD is entitled to enter into an individual agreement with the Customer regarding the PEAK surcharge.

For all international (export) Consignments, the Customer shall pay a Consignment inspection fee of EUR 0.2 per parcel.
