1. Frequency of data update - 3 times a day after data update by DPD, i.e 9:45, 12:15, 15:15
2. Verification of the status and services available at a given point
 - only use points with Active status
 - the possibility of sending a package with a service not supported at a given point should be blocked. The list of available services is in the Zaznaczone_uslugi column.

3. Distinguishing stationary points from lockers - parcel machines can be identified by the value "DPD Pickup Station" in the Dodatkowe_informacje field or by „Punkt SwipBox Infinity” in the „Typ lokalizacyjny” field.
4. To filter machines you can apply a filter as follows:
