

# DPD Fulfillment

Your logistics and fulfilment solutions from a single source: from processing incoming goods via warehousing and order picking to packing, shipping and returns management.

**Fast, reliable and efficient – ensuring even more success for your business.**

## What we offer you:

- processing incoming goods
- warehousing
- order picking
- packing
- labelling
- dispatch/goods issue
- returns management
- activation of standard interfaces
- value added service (VAS)

## The benefits

Fulfilment enables your company to simplify its daily operations and even expand its business. In addition, with the USPs of DPD Fulfillment we offer further advantages with which we clearly differentiate ourselves from conventional fulfilment companies.

### The advantages of fulfilment

- allows greater focus on purchasing/sales/marketing
- more efficient use of your own personnel
- highest quality levels across the whole process, and stronger customer loyalty to your company
- fixed prices ensure a high degree of planning security
- no storage costs in the event of idle time, for example
- maximum flexibility
- requirements can be expanded or minimised at short notice
- additional services (e.g. flyer inserts) bookable at short notice

### USPs of DPD Fulfillment

- late order acceptance, favourable pickup times
- maximum shipping speed thanks to efficient pre-selection and sorting by postcode
- reliable infrastructure, countrywide capacities
- the service adapts to shipping volumes
- pre-programmed interfaces between ERP systems and the DPD goods management system
- fast, low-cost connection of new customers, DPD assumes the programming workload
- everything from a single source: you have a central point of contact

## Contact and further information

Your personal contact person will be happy to get in touch with you, so that together we can determine your requirements and define the next steps. We look forward to hearing from you!
